

"Easy steps to better Manhole joints" with RAM-NEK®

RAM-NEK® high-adhesion permanently flexible plastic gaskets provide watertight seals on manhole sections of any size, shape or service - in record time, with minimum public inconvenience.

Backfilling may be started immediately after sealing a section. No special tools, no special work crews. A fast, simple installation with visual proof of watertightness in any weather.

RAM-NEK gaskets are distributed coast-to-coast through authorized stocking precast manhole and pipe producers. Contact your nearest precast manhole producer for technical details, or write:
